Schema Summary:
2018 End-of-Program Early Childhood Collection - Updated
Version 1.2

Recent updates allow for reporting of Great Start Readiness Program (GSRP) eligibility data. This information was previously reported in MEGS+ on the GSRP Child Information and Staff Report (CISR). The fields reported on the 2016-17 CISR now collected in the MSDS are: "Additional Risk Factors" and "Working Parents," along with "Qualifying Factors." If you do not report children in GSRP or GSRP/Head Start Blend programs, your system does not need to be updated for this collection. Files in the previous schema format will still be accepted for this collection. If you do report children in those programs, you should update your system, but you will also be able to manually enter the new fields in the Data Staging Area.

This document deals with schema rules only. It does not address business rule changes. Please refer to the component business rule spreadsheets, located in the MSDS Collection Component Matrix, for information about changes to validation business rules. You may also refer to the MSDS Collection Details Manual for additional information.

Revisions

Component	Characteristics	Version/Date	Comment
